

```
package Java_OOPS_Program;

class SimpleObject {
    SimpleObject() {
        System.out.println("Constructor of SimpleObject is called.");
        System.out.println("Object created successfully.");
    }

    public static void main(String[] args) {
        SimpleObject obj = new SimpleObject();
    }
}
```
